 - Worked in Implementation project of SAP Revenue Accounting and Reporting under IFRS 15 for European Telecommunication client (SAP ECC 6.0) for telecommunication company.
 - Worked in Implementation project of SAP Revenue Accounting and Reporting under IFRS 15 for telecommunication company (SAP ECC 6.0).
 - Experience in working in integration of multiple third-party tools with SAP.
 - Good knowledge of SAP HANA database, architecture, and syntaxes.
 - Experience in understanding the application & Business policies of the organization for implementing it in the applications and executing full life cycle of projects.
 - Responsible for the development of automation tools.

-
- SKILLS & ABILITIES**
- DDIC: Extensive knowledge on SAP workbench and SAP Data dictionary.
 - BRFPplus: Knowledge on BRFPplus configuration, deployment, and usage in ABAP development.
 - Reports: Developed and modified several types of reports on ABAP Netweaver 7.5, Interactive ALV reports, OOPS ABAP and OOPS ALV.
 - Enhancements: BADI and Standard Screen enhancements, customer exit, User Exits, VOFM Routines, BTEs, FI Substitution.
 - Interfaces: ALE/IDOC (Inbound and Outbound), IDOC Status, serialization of IDOCS, Extension IDOCS, BAPIs, SROXY, Application Interface Framework (AIF), Web service and WSDL Deployment.
 - Dialog Programming: Worked on Module pool, screen painter and flow logic.

- Forms: Worked on smart forms, SAP scripts and ADOBE forms.
- ODATA: ODATA service configuration, deployment, testing and enhancement of standard ODATA services.
- SAP DRC: Enhancement and support for compliance.
- S/4 HANA: CDS views, AMDP class and Basic HANA modelling.
- Cloud Services: Knowledge of SAP BTP and Cloud workflow management
- Functional: Functional Knowledge on SAP-RAR, SAP RE-FX, SAP-FI, SAP-MM, SAP-SD and SAP-EWM, SAP Security, Open Text VIM and Successfactors Employee Central.
- Knowledge on Third Party systems such as ONESOURCE, OANDA, ORACLE Finance Cloud and OTM.
- Performance tuning using SQL trace, ABAP code inspector checks, Extended program checks and modifying select statements and code logic for better performance.

EXPERIENCE

COGNIZANT | SENIOR ASSOCIATE

APRIL 2022 – PRESENT

Project #1

Technologies: ABAP 7.5, S/4 HANA, and SAP-ERP (FI, EWM, SAP Security, OPEN TEXT VIM, SAP MDG, SAP PP, MM, SD and Successfactors EC)

Roles: Design, Analysis, Development and Support.

- Responsible for developing program to upload FI invoices from excel with functionality to Post, park, and simulate functionality.
- Responsible for creating substitution exits for updating Vendor number in FI document from ANLA table.
- Responsible for enhancing DMEE structures for check payments.
- Responsible for developing program to send G/L actuals to Hyperion Interface and later converted to use as OData service.
- Enhanced BADI_ACC_DOCUMENT to include additional fields.
- Enhanced EDOC_COCKPIT in SAP DRC to save additional data in EDOCUMENT table using EDOC_CUSTOM_FIELDS BADI.
- Enhanced VAT DRC report to changes reporting currency to group currency as saved by business and extending standard CDS view.
- Development of ODATA service to fetch data from SAP DRC and send to Hyperion system for analytics.
- Enhancement of EDOC_ADAPTOR BADI for conversion of Hungarian currency.
- Responsible for analyzing FI related Incidents and provide technical resolution.
- Responsible for changes to Check print ADOBE form.
- Developed program to create VIM document from data in excel and same has been used as a Fiori application.
- Supported SuccessFactors (Employee Central) Integration with S/4 backend system.
- Responsible to developing report to update User parameters and

create respective user in Fiori gateway system.

- Developed report to Automate GL details FBL3N (RFITEMGL) report generation.
- Developed OData service to send data SAP-FI data to Hyperion System.
- Responsible in upgrade activities for Open Text.
- Responsible for enhancing /OPT/VAN_LIABILITY report to post and reverse FI documents for Accrual.
- Responsible for development of SPROXY for pricing data flow from Vendavo to SAP and vice-versa through SAP-PIPO.
- Responsible for supporting MDG developments and workflows.
- Responsible for development of report for Customer and material file interfacing between SAP and Vendavo
- Responsible for supporting integration between Highradius CRD and SAP.
- Responsible for screen enhancement of RECN transaction using BDT.
- Responsible to enhance /OTX/PF01_CL_MODULE_MAPIDOC class for VAT calculation when IDOC is received from ARIBA and Update Vendor name from BP config.
- Responsible for Custom code analysis for HANA Upgrade.

MERCEDES BENZ R&D INDIA | SENIOR TECHNICAL CONSULTANT

OCTOBER 2021 – APRIL 2022

Project #1:

Technologies: ABAP 7.5, S/4 HANA, and SAP-ERP (FI, SCM, EWM, RE-FX and RAR)

Roles: Design, Analysis, Development and Support.

- Developed report for Spare part asset activation and capitalization using OOPS ABAP and AMDP class.
- Developed report to change stock type of material based on custom configuration using OOPS ABAP and AMDP class.
- Responsible for development of report to copy invoice workflow.
- Responsible for development of product cost form using Smartform.
- Designed of preprinted shipping form.
- Responsible for enhancement of customer invoice using Adobe form.
- Responsible for change implementation of IFRS 15 and IFRS 16.
- Responsible for creation of VOFM routine to include intercompany sales order while Tax calculation.
- Responsible for development of interface using IDOC to create or modify Location in T499S table.
- Responsible to develop interface to fetch change management data

from SOLMAN and display in PowerBI.

- Enhanced ZXVVFU08 (Include) to Update Trading Partner in FI document line items during cancellation of Billing Document.
- Developed ODATA service for Invoice approval in mobile APP.
- Developed ODATA service to send finance data to POWER BI.
- Developed ODATA service to send material movement data to Fiori App.
- Developed ODATA service to update GR data.
- Responsible for enhancement of existing ODATA services.
- Responsible for Development of Outbound/Inbound interfaces using AIF.
- Involved in Solution designing, testing and support activities.
- Support end user by resolving issues timely and maintaining high quality.

FIS GLOBAL SOLUTIONS PVT. LTD. | SENIOR ENGINEER – PRODUCT DEVELOPMENT

JAN 2020 – JUNE 2021

Project #1:

Technologies: ABAP 7.5, S/4 HANA, and SAP-ERP (SD)

Roles: Analysis, Development and Support.

- Developments for contract creation and billing.
- Responsible for change to Customer Master to update Tax jurisdiction code from ONESOURCE and fetch address validation from SABRIXURL using SPROXY.
- Responsible for integration of SAP billing platform to Oracle Finance (cloud).
- Responsible for migration of existing crucial reports to HANA platform
- Responsible for code compatibility check to migrate SAP objects to HANA and optimize existing SAP objects to HANA syntax.
- Responsible for development to send failed invoice report to respective email-ID in .pdf format using ADOBE forms.
- Responsible for development to generate output form of Invoice list using ADOBE form.
- Responsible for development to automate F-30 credit memo clearing process.
- Responsible for enhancement of existing objects to integrate with ONESOURCE.
- Responsible for enhancement of sales order pricing procedure.
- Responsible for enhancement of customer master screen to add custom fields.

- Developed BDC to change pricing type of contract in bulk.
- Responsible for development to send Sales order and Invoice data to ORACLE Finance.
- Responsible for development of CIBC ACH report to send customer bank data to respective Email-ID in excel and .pdf format.
- Responsible for development of report to set taxability of material and customers.
- Developed tool to fetch currency exchange data from OANDA link.
- Developed DP Global Invoice.
- Involved in developmental activity for billing integration projects.
- Involved in resolving Production issues and incidents.
- Involved in OneSource and Planview integration with SAP.
- Support SAP billing system users by maintaining strong internal controls, resolving system issues timely, and completing small-scale enhancements timely and with high quality.

ACCENTURE SOLUTIONS PVT. LTD. | APPLICATION DEVELOPMENT ANALYST

JULY 2016 – OCTOBER 2019

Project #1:

Technologies: ABAP7.5 and SAP-ERP (FI, SD, and MM)

Roles: Analysis, Development and Support.

- Extended additional functionalities (Addition of more fields, language change according to geographical region and orientation) to already existing SAP forms, scripts, and adobe forms.
- Extended new functionalities to OTC forms (Order, Delivery, Invoice), Purchase Order forms and Request for Quotation forms.
- Enhanced requirement routines and standard FM for Orders and Invoice.
- Responsible for development of objects such as EVAT report, Temporary Admission Report, Dangerous Goods certificate, delivery instructions and split invoice.
- Developed object to send MM material master data from SAP to third party system via IDOC and capture changes through change pointer.
- Developed SPROXY to update PO conditions as received from third FX interface using BAPI_PO_CHANGE.
- Extended standard IDOC types (DEBMAS05, CREMAS05, MATMAS05)
- Developed ABAP Proxy to send PO data to third party.
- Developed tool to send SAP-FI Master data (Vendor, Customer, and exchange rate) from SAP to third party system via IDOC and capture changes through change pointer.
- Extended new functionalities to Unified Transfer Document using

ADOBE forms.

- Responsible for handling change ticket management using SAP-SOLMAN.
- Developed status monitor tool, which will provide summary report of all interfaces between SAP and third party (EDICOM, URUWARE, FX-Sice).

Project #2:

Technologies: ABAP 7.4, SAP RAR.

Roles: Analysis, Development and Migration Support.

- Developed custom programs in SAP-RAR R/3 system using ABAP/4 according to the requirements of client under the IFRS15 revenue reporting standards.
- Responsible for developing report to create new IDOCs from existing IDOCs by just changing data of required fields in the segments for testing purposes and report to consume data from application server and enrich standard tables after processing.
- Responsible for development to fetch all POBs for Company Code and billing date, Generate Last invoice for a fulfilled POB,
- Responsible to mitigate defects that arise during testing.
- Responsible for monitoring and bug fixing during Mock Migration and Production Migration.
- Good exposure to functional working of SAP-RAR and support during UAT of different releases.
- Responsible for creation of automation tool to configure jobs in SE36 running sequentially by using script and excel file.

Project #3

Technologies: ABAP 7.4, SAP-RAR, REDWOOD

Roles: Analysis, Development and Production Support.

- Responsible for understanding business requirements and developing custom codes as per client requirements in SAP-RAR R/3 using ABAP/4.
- Responsible for development to convert GL documents to .xml format for feedback, Updating FOREX values in currency table and changing the status of Performance Obligation.
- Developed Classes in SE24 to manage various events such as inception, bill run, termination etc.
- Used BADI enhancements and User Exits to modularize standard SAP functionality as per client requirements.

- While working on defects, I have detected few standard issues that have been raised to SAP and later applied as OSS notes.
- Good Exposure to functional working of SAP-RAR and support during Product Testing, Integration Testing and UAT.
- Responsible for creation of various automation tools such as uploading IDOCs from one system to another.
- Responsible for developing Regression Test Automation tool, which executes all test cases simultaneously automatically, and helps to do regression testing when some OSS notes are applied using module pool, global class method and workflow.
- Responsible to handle REDWOOD scheduler tool, which in turn automates working of the business activities of the project.

EDUCATION

KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY | BACHELOR OF TECHNOLOGY
Electrical and Electronics Engineering | 2012 - 2016 | GPA: 6.99

COMMUNICATION

Involved in requirement gathering with client business managers.
Presented solutions for business requirement to client.
Participated in leadership calls with client and company management.

LEADERSHIP

As a Team Lead, oversaw and motivated a team of 6 ABAP resources.
Co-ordinated task to resources and presented daily updates to senior management.
Driven daily status calls within the team to understand any hurdles or needs of the team.
Prepared template to track the status of activities assigned to the team.
