WHAT I AM

10+ years of experience in Software Development

Facilitated Scrum framework – sprint planning, backlog grooming, daily scrums, sprint reviews and sprint retrospectives.

Proactively identified and found ways to resolve issues to prevent distractions and keep projects on track.

Led sprint reviews and planning meetings to promote full team engagement.

Collaborated with product owners, team members, technologists, and other scrum masters to define solutions and drive progress.

Managed product backlog and supported Scrum framework for monthly sprint releases.

Anticipated impediments to team delivery involving cultural barriers and logistical challenges.

Shielded scrum team from external interference for optimal productivity and success of Agile process.

Managed work and project responsibilities by assigning tasks to internal individuals and external teams.

Estimated development effort; designed and implemented approaches for deliverables.

Coordinated efficient large-scale software deployments.

Evaluated project requirements and specifications and developed software applications that surpassed client expectations.

Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.

Designed updates to existing software to meet changing customer demands.

1. Agricultural Original Portal (AGOP- Industry Cloud)

AGOP: June 2021 to TILL DATE – SAP ABAP OOPS, RAP Framework, S4Hana, Cloud Platform Integration, Business Technology Platform, RESTful API, Fiori ; **Team Size:** 25

Description: The SAP Agricultural Origination Portal, part of the Industry Cloud, built on SAP Business Technology Platform, enables efficient collaboration between farmers and agricultural origination and trading organizations. This is achieved by providing farmers real-time access to their contractual obligations, deliveries, settlements, and unsold inventory. Through an intuitive cloud-based offering, farmers can make insightful decisions and agricultural companies can reduce back-office workload and increase business partner satisfaction while lowering IT costs.

Roles & Responsibility:

- Managed the delivery of Agri Origination Portal (AGOP) as Industry Cloud Application
- Chaired daily scrum and led sprint plans/reviews with PO and assign resources, prioritize new requirements, monitor backlog, and strategize upcoming release.
- Led an agile feature team of 25 member with 3 ToTs to work on microservices to enable handshaking of data with cloud with SAP S4Hana for Agricultural Commodity Management
- Worked with ACM Customers(CHS, Cargill, ADM etc.) , Product owners and developers to deliver the SAP S/4 Hana solutions with agile methodology.
- Involved in software design, code reviews for BTP Java, Cloud Integration, and SAP S/4HANA RAP development and content publishing activities on SAP API Hub

2. ACM Fiori Applications

AGOP: February 2020 to June 2021 – SAP ABAP OOPS, ODATA, CDS, Fiori ; **Team Size:** 30

Description: We started with first FIORI based tiles and views in SAP S/4HANA 1909, mainly targeting display of key objects in SAP Agricultural Contract Management (contract, application and settlement) and simple activities like release of contracts or release of settlements. Now, we focused on the key role of a merchant and trader to address their needs and provide them with an easy to use, intuitive, web-based FIORI front end.

Roles & Responsibility:

- Managed the delivery of ACM functionality on Fiori UIs
- Successfully delivered the Product within allocated timeline with 50% capacity
- Led 3 ToTs and coordinated work across the layers with SAP S4Hana for Agricultural Commodity Management
- Worked with ACM Customers – CHS, Product owners and developers to deliver the SAP S/4 Hana solutions with agile methodology.

3. SAP Business ByDesign

AGOP: July 2014 to January 2020 – SAP ABAP OOPS, BOPF, BSA, MBF, MDAVs, UI Designer, Fiori, Ruby ; **Team Size:** 60

Description: SAP Business ByDesign is a cloud-based on-demand business management solution designed for small or midsize businesses. SAP Business ByDesign is a full-featured cloud ERP software solution that allows customers to enjoy the power of large-scale business applications without the need for IT infrastructure.

Roles & Responsibility:

- Managed the delivery of Functional and legal requirement for SAP ByD Financial Accounting
- Worked extensively with developers on ABAP, Excel Uploads and UI Designer
- Functional expert on Fixed Asset, Manual Journal Entry Voucher, Journal Entry and I2D framework
- Conceptualized and implemented the feature upload of funds from Excel in Fund Accounting and Rule Business Object in Asset Under Construction topic
- Have developed a strong knowledge about financial accounting – in particular the General Ledger Accounting Process
- Implemented A2X and A2A service for mass upload of product master data using communication arrangement
- General Ledger Accounting Expert, Local Performance Improvement Expert and A2X Interface Expert for Financials ByDesign
