📍 1211/408 Lonsdale street, Melbourne, VIC 3000

About Me

Dedicated and goal oriented data enthusiast , experienced in SAP and FIORI Full stack Development, currently taking the role of Consultant, always upfront and towards the path of being a virtuoso in the development and understanding of business user stories/requirements. Consistently on the lookout to gather knowledge on variegated topics and an avid book reader. Google is my favorite companion and is always there by my side to get me out of convoluted pickles in development.

Out of Work, I get myself indulged in turf sports, playing FIFA and grab a hold of my guitar, pulling in some melody. I am a traveler with the sole purpose of getting to be acquainted with new places and people. I am keen on being aware of new technologies emerging into our lives and love following up on the Stock Market.
