ROLE AND RESPONSIBILITIES

As a part of development team in this Agile based project, key responsibilities are to work closely with SAP standard product team and understand the Fashion Management process and enhance the functionality for all the SAP Fashion Customers.

- Worked on product-based SAP HANA Fashion (Retail) Project using ABAP 7.5 syntaxes.
- Responsible for adding the segmentation functionality to the standard program, needs to display a field, working on displaying the dynamic field on the screen as well.
- Worked on to ALV, module pooling, RFC and OOPs concepts.
- Analyzing and debugging the standard program to add the code.
- Created methods, GUI definition, Messages for the segmentation feature
- Made changes in the Screens, Subroutines and Function Module to get the segmentation data for the required development.
- Worked closely with QM module to enhance multiple QM transaction with segmentation feature, created multiple classes and methods to achieve it. e.g. (QE51n, QA32, QA01, QP01, QGA3, QGA4)
- ABAP unit creation for the created methods.
- Enhanced the standard IDOC MATQM with new segment for the fashion feature.
- Enhanced the adobe form INSPECTION REPORT to add segmentation field in the PFD.
- Have knowledge and worked on CDS, Fiori UI5 concepts, Created the schedule feature for the master production and planned order on the Fiori app using RAP concept.
- Creation of TR, releasing the TR and I7P knowledge
- Documents preparation required for the development. For example, Software design document, Developer unit test documents, analysis document etc. Frequently worked with JIRA tool.
- Good functional knowledge like Article creation, Bill of Material, Routing, Production Orders, Planned orders, Sales Order, Sales order, Bill of Material, MRP, Master Orders, Combined Master Orders, etc.
