PROFESSIONAL EXPERIENCE

Application Development Analyst

Accenture

February 2022 - Present

Gurugram, India

Data Transformation Leader:

- ❖ Spearheaded a transformative initiative within the Master Data Consolidation (MDC) system, enabling the data team to execute rapid mass updates, insertions, and deletions of email notes linked to customer records.
- ❖ Drove a significant improvement in data precision and operational efficiency, showcasing proficiency in SAP ABAP coding practices and S/4 HANA, particularly in architecture, data models enhancements, and integrations.

Workflow Optimization Expert:

- ❖ Engineered streamlined workflow routing through BRFplus table design, showcasing proficiency in BADIs, BRF+ workflows, and SAP MDG capabilities.
- ❖ Implemented workflow agent determination across domains, achieving a 25% reduction in process delays and enhancing overall workflow efficiency.

Custom OData Service Development:

- ❖ Developed a custom OData service from scratch for customer replication from a third-party system.
- ❖ Implemented a method to identify and return customer duplicates, showcasing proficiency in OData, SAP Fiori, and webdynpro, resulting in a 30% reduction in data duplication and enhanced data integrity.

Efficient Customer Replication Process:

- ❖ Implemented a change request creation process for replicating customers to SAP MDG from a third-party system.
- ❖ Streamlined the customer replication process, reducing manual effort by 40%, demonstrating expertise in SAP MDG technical, and ensuring consistent data synchronization.

Utilization of SAP MDG Governance API:

- ❖ Leveraged the Governance API of the SAP MDG tool to create materials as exact replicas of existing materials.
- ❖ Achieved a 50% increase in efficiency in material creation and maintained impeccable data consistency across systems, showcasing proficiency in SAP MDG Governance API.

Automated Communication Innovator:

- ❖ Built an automated email notification mechanism for requesters and approvers at each workflow step.
- ❖ Improved communication, reducing approval cycle time by 20%, and enhancing overall process transparency, demonstrating proficiency in FPM, SAP Fiori, and webdynpro.

Standard Methods Enhancement:

- ❖ Enhanced standard methods to customize responses, allowing the inclusion of entities as arrays without requiring entity posting from the payload.
- ❖ Improved system flexibility by 40% and achieved a 50% reduction in data retrieval time, showcasing proficiency in SAP ABAP coding practices and integration with SAP MDG.

Systems Engineer

Infosys

January 2020 – January 2022

Pune, India

BRF+ Optimization for NWBC Applications:

- ❖ Led the implementation of BRF+ to enhance standard NWBC applications, elevating user experience and operational efficiency.
- ❖ Collaborated seamlessly across teams for a smooth transition to SAP MDG, providing crucial technical specifications.

Customer Data Model Expansion:

- ❖ Extended the customer data model with custom fields, aligning enhancements with additional business requirements.
- ❖ Demonstrated SAP ABAP coding expertise, improving data completeness for heightened business utility.

Seamless Structural Mappings:

- ❖ Executed structural mappings for intricate data model transfers, ensuring seamless data consistency and integrity.
- ❖ Applied SAP MDG architecture insights to enhance data transfer mechanisms between systems.

BADI Customization for Data Governance Precision:

- ❖ Customized BADI enhancements for Customer Master Data Governance, reducing errors and aligning with business requirements.
- ❖ Showcased SAP MDG technical proficiency, ensuring precision in data governance processes.

CDS-Driven Analytical Reports:

- ❖ Utilized Core Data Service views (CDS) for custom analytical reports, enabling data-driven decisions.
- ❖ Improved operational efficiency through SAP Fiori and webdynpro integration, enhancing user accessibility.

OBJECTIVE

Experienced SAP MDG professional with over 3+ years of hands-on expertise in optimizing data management processes to ensure data integrity. Proficient in SAP MDG tools, BADI/BRF+ customization, CDS views, API development, and MDC enhancement. Seeking to leverage expertise in SAP MDG to drive effective data governance and process optimization within organizations.

EDUCATION

B. TECH - Computer Science 2015 – 2019

University Institute of Engineering and Technology, MDU Rohtak, Haryana.

AWARDS

Pinnacle Award FY23(Accenture)

ACE Q3 FY22(Accenture)

SKILLS

- SAP MDG Tool and Governance API
- OData Services
- MDC Enhancement
- Workflow Management
- Data Replication and Governance
- Custom Search Helps
- Customization and Enhancements
- Core Data Service Views (CDS)
- BADI and BRF+
- Data Modeling and Extensions
- Validation Rules
- Charm Tool
