Summary

I am a software engineer with an year of experience in Full Stack Web Development.

Experience

-Internship at Publicis Sapient

Engaged in Machine Learning project focused on automating the resume shortlisting process for job applicants, efficiently identifying qualified candidates for potential employment. My major work was to collect and scrape relevant data of Applicants from their resumes and also from the web.

-Associate Software Developer Engineer at Publicis Sapient

I was an integral part of small and agile team, where my daily responsibilities encompassed a diverse range of tasks. These included actively participating in standup meetings, contributing to both basic frontend and backend services, collaborating closely with team members on brainstorming sessions to refine the project direction, and writing BDD tests using selenium.

Projects

-DIGIWAITER

I contributed to the development of a web application designed for restaurant users to conveniently order food by simply scanning a QR code, by passing the need to interact with waiters. In this project, my responsibilities encompassed conducting BDD testing for the webpages and actively coding both frontend and backend components for specific microservices.

Programming Languages

Python

Java

Html & Css

Javascript

SQL

Certifications

-AWS Cloud Practitioner

Hobbies

- Calisthenics
- Chess
- Football

-RSI-ASSASSINS

I am currently working on the development of a stock market web application that provides real-time market prices of various stocks and offers valuable recommendations based on a combination of price and RSI (Relative Strength Index) indicators. This application is specifically tailored to cater to swing investors, enabling them to make informed decisions and optimize their investment strategies

Technical Skills

Operating systems-Linux(Debian),Windows

Web Development-ReactJS, Spring boot,

Testing tools-Selenium,JUnit

Libraries-Numpy,Pandas
