4 years of experience working with ABAP to create reports, forms, interfaces, BADI's, user-exits, OData services, enhancements while debugging and analyzing custom and standard programs and enabling third-party services using REST APIs and IDOCs across FI CO, SD, MM, Logistics modules in SAP ECC and S4 HANA.

Experience

APRIL 2022 - PRESENT
Senior Associate – Process / Coforge, Greater Noida, India
- Worked primarily on SAP ECC for SIAM city to develop custom dashboards, interactive reports, smartforms, using BAPIs, BADI / user exists and RFC FMs and optimized over 50 existing reports/FM/ hence bringing down client's execution time in half and streamlining processes.
- Developing common utility classes and FM's for extensive use throughout the system and
- Interacting with onsite team, overseas client and functional counterparts for requirement gathering, analysis, proposing optimized solutions and designing test cases along with setting estimations.

JUNE 2019 – APRIL 2022
Associate Analyst / Deloitte USI, Bangalore / Gurugram
- Worked in SAP S/4 HANA for 3 international clients to develop reports, interfaces, enhancements and adobe smartforms
  to generate forms, bills, invoices with integrated BAR codes and digital signatures.
- Optimized existing programs, debugged custom and standard programs created technical and testing documents along with designing and executing test cases.

Skills

HANA • ADOBE FORMS • CDS • INTERFACES • BAPI • ALV REPORT • ENHANCEMENT • ODATA BASICS • BADI • USER-EXIT• SMARTFORM

Education

JUNE 2019
Bachelor of Computer Application/AIIT, Amity University
APRIL 2015
Class XII/Vardhaman Public School, Mirzapur   CBSE
MAY 2013
Class X/Daffodils Public School, Mirzapur   CBSE

Projects-

April 2022 - July 2023
SIAM City Cements (SAP ECC - Support and Migration)-
Worked on core ABAP objects like Reports, Interactive reports, ALV, Smartforms, Function Modules, BAPIs, TMGs, Enhancements, BADI's, and resolved over 350 tickets which involved new requirements such as creation of a new report from scratch and optimised/debugged existing programs to resolve issues or add functionalities.
Day to day activities involved Gathering requirements from functional person and client, providing estimates and efforts, developing objects, completing the unit testing and creating technical and test documents.

February 2020 - April 2022
Kansas city southern railway (SAP S4/HANA Implementation)-
Worked in technical team as an ABAP consultant to gather requirements from functional person and clients, provide estimates and then developing objects such as Reports, Adobeforms and SmartForms, RFC FMs, OData services, CDS views, BADIs, Creating Tables, Data elements, and debugging existing reports to resolve dumps.

August 2019 - Kanuary 2021
Becton Dickinson (SAP S4/HANA Implementation)-
Worked initially as a shadow resource while helping seniors in their objects and task while learning the fundamentals of ABAP and it's concepts.
