IT SKILLS:

- Operating systems: Windows 10/11 ,Mac,.
- Mobile System:iOS ,Android.
- Language:c , java, javascript.
- Databases: Oracle 10g, SQL server.
- Technologies : Xml, .NET,Json Schema,Maven,Git Repository ,Github.
- Testing Tools:JIRA TESTRAIL,Postman, Test Link,Selenium webdriver,Swagger, putty SSH, Jmeter.
- Debugging SKills: Networks API,console validations,performance testing using Sql.
- Testing Skills: Analytics Testing ,API Testing, Performance Testing, Functional Testing,Automation Testing,manual analyzer testing,Sql Database Testing.

Accomplishments :

- Handled a Team of 10 members.
- Troubleshooting the issues and finding the defects.
- Created and Verified Web services API requests.
- Automated Validate JSon Schema using POSTMAN

Personal Details

Date of Birth: 1997-07-10

Eligible to work in: any location.

Highest Career Level: 1-2 years experience

Industry: Software Development (IT)

Total years of experience: 2.5 years

PROJECTS DETAILS:

Project 1

Company Title: Wilco Solutions IT Hospital software Consumer Database

Client: brinnova hospitals

Role: software tester trainee

Tools:selenium web driver, testrail,test link,eclipse.

Project 2

Company Title: Aggregate Intelligence Fare track (Data Management Software) Team 10

Role:ETL tester

Client: airlines

Tools: my sql,db viewer, no sql,jira, mongodb, json schema.

Project 3:

Company Title Denovo Lab (Voip Software)

Class 4 Fusion is an innovative all-in-one solution capable of integrating all business workflows through a platform.

- Routing
- Switching
- Billing
- Client Portal
- Vendor Portal
- Agent Portal

Client: hong kong based

Tools: swagger, post man,jira,sql,selenium webdriver,testrail.

Role:api testing

Duration: current

Work Experience 1:

Software Test Engineer

Denovo Group - Ho Man Tin, Kowloon

December 2021 to Present

Devonolab provides the world's leading communications service providers and enterprises embrace the next generation of SIP-Modal.

Key Result Areas:

- Involved in QA Activities Like Test Planning, Requirement Analysis, Creation of Test Traceability Matrix, Test Case preparation .
- Coordination with the sub-platforms, QA Environment team and development team for the Defect fixes and CR's.

System testing, System Integration testing, Test Reporting, Defect Management, Change Requests of the application.

Responsibility:

- Validating API Connections: APIs set up correctly are often the reason why your applications function as expected. And in this technology-driven world, your users expect APIs in your software applications to work 100% of the time. By running API testing automation within your QA practices, your team has a simpler, more convenient way to verify API connections to maintain the product.

Work Experience 2:

Quality Analyst(ETL TESTER)

Aggregate Intelligence

June 2020 to 2021

Company Profile: DATA intelligence

The Aggregate Intelligence database management system is the perfect solution to support your growing business and workshop with you powerful yet simple-to-use tools for the everyday workings of your data and advanced measurement and reporting facilities to ensure have a close eye on exactly how well your business is performing from anywhere in the world. Aggregate Intelligence has not only been built with data in mind but has been built with Client relation to ensure every feature is exactly what you'll need and more and that the performance reporting tools really do work to get the best from your work force.

Key Result Areas:

- Involved in Preparation of estimates for overall QA team involved in the project, Scrum Planning, Project requirement analysis, Creation of Test Traceability Matrix, Test Case preparation, System testing, System Integration testing, Database testing, Test Reporting, Defect Management, QA Automation Test Execution Change Requests of the application.
- Coordination with QA Environment team and development/DBA teams for the Defect fixes and CR's.
- Daily Scrum calls, Sprint meetings with the Business team and sending the Daily/Weekly Status Reports on Project Progress

Software Engineer Trainee (INTERN)

Wilco Solutions

November 2019 to July 2020

Description:

The project deals with storing and maintaining the client's consumer data which is extracted from multiple source systems into Sql database and verifying the same in application UI.

Responsibilities

- Performed detailed test case design and executed tests.
- Documented and analyzed all test results and made recommendations.
- Published test summary reports.
- Planned and executed regression testing and automation of regression testing processes.
- Coordinated with project managers and IT department to ensure time management.

EDUCATION DETAILS:

ORGANIZATION	UNIVERSITY/BOARD	PERCENTAGE.	YEAR
SHADAN COLLEGE OF ENGINEERING AND TECHNOLOGY	JAWAHARLAL NEHRU TECHNOLOGY UNIVERSITY HYDERABAD	6.2	2016-2020
SRI CHAITANYA JUNIOR COLLEGE	INTER BOARD OF SECONDARY EDUCATION	60	2013-2015
VASAVI PUBLIC SCHOOL	CENTRAL BOARD OF SECONDARY EDUCATION.	70	2002-2012

EXTRA CO-CURRICULAR ACTIVITIES:

- Recipient of 'Innovative Award' for optimizing the testing effort using innovative tools and techniques in Aggregate
- Recipient of ' Great learner award ' for optimizing the testing effort using innovative tools and techniques in WilcoSolution
- Recipient of 'Dedicated volunteer of the year' from Wilco Solutions outreach team

Other Activities:

WRITING SKILL - Content Writing , Calligraphy.

Sports: NATIONAL ARM WRESTLER - TELANGANA ARM WRESTLING COMPETITION.
