Summary:

- 11+ years of experience in IT industry; scope of excellence entails: **Software Testing & Business Analysis, Test Automation, Senior Software Test Engineer and on-site coordinator.**
- Worked primarily in the **Banking, Airlines, Travel, Store Information Management System, SAP, HealthCare domain** applications.
- Experience in Automating Banking Application Using AI Powered based automation tool known as **ACCELQ**
- Expertise in Functional Testing, Smoke Testing, System Testing, Integration testing and Regression testing for web-based applications
- Proficient in development of test scripts using Java in Selenium Web Driver
- Experience in automation of **Mobile** application using **See Test** also known as **EXPERITEST** Automated scripts for IOS, Android Native and Mobile web-based applications (safari for IOS & Chrome for Android).
- Experience in manual testing on **E-Commerce** and virtual travel-based application **QUAQUA**
- Expertise in **Test Management and Defect Tracking System such as JIRA, DevOps**
- Experience in **Functional Testing, System Testing, Integration Testing, UAT, Smoke, Compatibility, Sanity, Regression, Automation Software Testing, production support.**
- Good Knowledge on Frameworks such as Junit, TestNG, JBehave and build automation tool like **Maven**
- Experience in Git and GitHub for source code management.
- Interaction with **Customers/Clients** and the **Development team.**
- Strong Analytical and problem-solving skills. Ability to quickly master new concepts and applications.
- Quick learner, excellent team player, ability to meet tight deadlines and work under pressure.
- Thorough working experience in SDLC and Agile methodology projects & Extensive knowledge on test development life cycle
- Expertise in preparation of Test Cases, Test Plan, Test Schedule, Test case execution and Bug Reporting
- Excellent interpersonal skills, proven team player with an analytical bent to problem solving and delivering under high stress environment

Domain Experience:

Banking & Finance, Travel, ACCELQ, Retail, Airlines, HealthCare, Insurance.

Technical Skills:

Product Testing	Banking & Finance Application (Corporate One Bank) Virtual based Travel Domain (QuaQua application) Functional testing on Automation Tool (ACCELQ AI Automation tool) Store Information Management System (Rent A Center) Airlines (Southwest Airlines) HealthCare (Napier Health care) SAP -SD Module (Lubrizol Corporation)
Testing Techniques/Skills	Functional Testing, Web Testing, Unit Testing, Regression Testing, User Acceptance Testing, Functional Testing, UI testing, Mobile testing, and Automation Testing.
Testing Phases	System Testing, Smoke Testing, Sanity Testing Integration Testing and User Acceptance Testing, Production Support, Regression Testing, Ad hoc

	Testing and Automation Testing.
Automation Tool	ACCELQ, Mobile Automation (SEE TEST), Selenium web driver, TestNG, JUNIT
Operating System	Windows
Defect Management Tools	JIRA, Azure DevOps, HP ALM
Programming Languages	Java
Database	PostgreSQL
Version Controlling tools	GIT
SDLC Methodology	Agile & Waterfall

Professional Experience:

Xebia

Feb 2021 – Till Date

Senior software Test Engineer

- Performing Functional and Automation testing on Members Only Application
- Created 600+ Test automation Scripts to cover the functional flow of the application using ACCELQ tool.
- Timely and weekly execution of Smoke, Sanity and Regression Test scenarios
- Maintaining test execution and defect management in Azure DevOps
