WORK EXPERIENCE

10Times (June 01, 2021 - June 15, 2023)
Data Engineer

Retail Data Integration (Dec'22-Jun'23)

- Analyzed source systems and identified data quality issues, transformations, and business rules.
- Designed the ETL architecture and data flow using Informatica PowerCenter.
- Created mappings, transformations, and workflows to extract, transform, and load data. Implemented complex transformations, data cleansing, and data validation rules.
- Wrote SQL queries, stored procedures, and views to extract data from source systems.
- Performed data manipulation and transformation tasks using SQL.
- Developed complex SQL queries to join, filter, aggregate, and manipulate data.

Healthcare Data Integration and Compliance Project (Jun'21- Nov'22)

- Implemented end-to-end data integration solutions using Informatica PowerCenter, enabling seamless data flow between various systems and databases.
- Designed and developed ETL mappings, workflows, and sessions to extract, transform, and load data from source to target systems with high efficiency and accuracy.
- Leveraged SQL queries for large-scale data processing and collaborated with cross-functional teams to gather requirements, and ensure data quality and consistency across different business applications.
- Utilized Azure DevOps for version control, automated deployments.
