Developed the technical specification based on Business Requirements.

Worked on ALV reports .

Experience in writing Structured Query Language (SQL) , Scripts, Conditional Statements, parallel cursor technique.

Worked on Adobe forms , Smart forms, SAP Script .

Knowledge on Module pool Programming , OOPS concept in SAP, IDOCs ,BAPI, RFC.

Knowledge in creating Data Dictionary (DDIC) objects like Domains , Data Elements , Lock Objects,

Structures , Tables , Views , Search Help .

Worked on Enhancements .

Debugging techniques-Break Points- Experience to debug Programs. Review the bug fixes and helping the team with technical solutions.

SAP Consultant

April 2023 – Present

Techbrawn

Gurugram

PROJECT NAME: Shoppers stop

BUSINESS REQUIREMENT

- Company uses SAP ERP to enhance its operations.I was part of implementation team. The requirement was to work on ALV report.

PROPOSED SOLUTION

- I have created ALV Report for generating Purchase order and displaying it in ALV.
- I have created RFC .

Senior System Engineer

November 2021 – february 2023

Infosys Ltd.

Chandigarh, Chandigarh

PROJECT NAME: Metro AG

BUSINESS REQUIREMENT

- Company uses SAP Model to enhance its operations.I was part of support team. The requirement was to work on one of the RICEF objects.

PROPOSED SOLUTION

- Worked in entire pipeline from creation of transport requests to release.
- I have done version management and compared the code in development and quality system.

PROJECT NAME: Tyson foods'

BUSINESS REQUIREMENT

- I was part of support team and My task was to analyse the code and find the error in standard screen.

PROPOSED SOLUTION

- Review the bug fixes and helping the team with technical solutions.
- Helped in setting the breakpoints in right place.
- I have created Technical Specifications.

PROJECT NAME: Ferrara Candy Company

BUSINESS REQUIREMENT

- It was an implementation project. The requirement was to create Smart form (GR Slip) from scratch in MM Module. Output is triggered through MB20 T-code

PROPOSED SOLUTION

- I have created complete form layout and added data at header level as well as item level. Note: The challenging part was to add the requirement routine where execution of form was restricted to fields maintained in TVARVC table.

System Engineer

April 2020 – November 2021

Infosys Ltd.

Chandigarh, Chandigarh

PROJECT NAME: Spirit Aerospace

BUSINESS REQUIREMENT

- It was an implementation project. The requirement was to work on one of the RICEF objects(Enhancement). The module was SD. A custom field was required in one of the tabs in a T code VA02-change sales order.
- The requirement was to add table control in one of the tabs in a T code MM03-material master record.
- The requirement was to work on Adobe forms for creating purchase order.
- The requirement was to create ALV report in SAP.

PROPOSED SOLUTION

- I have created adobe form from scratch. I have added scripts in script editor to hide the field in adobe form on the basis of some condition. I have debugged the driver program to add Conditional statements and select queries. I have changed the complete layout of existing form also.
- I have created ALV report using oops and module pool programming. Note : The challenging part was to add authorization group where control was restricted to a certain plant in ALV display.
- I have created custom T-code in se93 and created messages through se91 for ALV report.

System Engineer trainee

Oct. 2019 – March 2020

Infosys Ltd.

Mysuru, Karnataka

- The training was divided into two parts:
- Generic: Python, Databases, Communication Skills.
- Stream: SAP ABAP.
- Created an online application in SAP ABAP Module using SAP Web Dynpro.

Product Engineer Intern

Jan 2019 - June 2019

Intellect Design Arena

Mumbai, Maharashtra
